Chapter I

1.1 Introduction

The inter-state movement/flows of goods between the various States of India is commonly known as Inland Trade, which involves movement of goods by five modes namely, (a) sea, (b) air, (c) rail, (d) river, and (e) road. This report published by DGCI&S involves inland trade of goods by Railways, Air-ways and river-ways while that by sea is included in report "Inland costing trade" of DGCI&S.

The report "Inter-State Movements/Flows of Goods by Rail, River and Air" is based on the data compiled from the data received from Centre for Railway Information System (CRIS) in collaboration with Railway Board, Inland Waterways Authority of India (IWAI) and Domestic Airlines on rail, river and air borne inland trade respectively within the country.

1.2 Scope of the publication:

The data published in this volume relate to (i) Quantity figures of 169 Principal Commodity Groups (8-digit level ITCHS codes have been regrouped into 169 homogeneous Principal Commodity Groups for ease of computation for easy understanding of the basic trade. All these groupings have been done in consultation with Directorate General of Foreign Trade (DGFT) under Ministry of Commerce and Industry) moving by Inland rail and river among different States and Union Territories and (ii) Cargo in gross weight moving by air from airport to airport and also to States and Union Territories within the country. This edition also contains the Intra-State movement of goods within India as well as movements in the territorial waters of India.

1.3 Sources of the Statistics:

The basic documents for the statistics in this publication are the invoices relating to consignments of commodities dispatched from each railway station in India. While dispatching the goods, the data is captured by CRIS through their system called Freight Operations Information System (FOIS) and is consolidated at an all-India level which is then shared with DGCIS.

In case of movement of goods through Waterways, the data is collected from the returns filed by various agencies carrying consignments through the National Waterways with the Inland Waterways Authority of India (IWAI). It may be noted that there is significant traffic movement of cargo from temporary jetties/anchorages in high seas, such as Diamond Harbour, Sagar in West Bengal to the nearest ports. These movements have been captured by the IWAI and shared with DGCIS and has also been included in this publication since the movements have been within the territorial waters of India.

In case of air cargo, the sources are domestic Airlines (like Air India, Go Airlines, Blue Dart Aviation Ltd., SpiceJet and Indigo), who collect airway bills from consignor or consignee and compile airport-wise cargo movements.

1.4 Quantities and Denomination:

The figures in these accounts relate only to quantity, as value figures are not available on railway, riverway and airway invoices. The quantities are expressed in gross weight recorded in the railway, riverway and airway invoices. The metric system is adopted in the Table I of this publication. The reported unit of weight is in 'Ton' in case of Rail & River and Air.

1.5 Commodities covered:

169 Principal Commodity Groups has been taken into consideration for reporting purposes. 8-digited ITCHS codes in India are to suit the national trade requirement with standard unit, as against the 6 -digited international HS codes. These ITCHS codes have been regrouped into 169 homogeneous Principal Commodity Groups for easy understanding of the basic trade. All these groupings have been done in consultation with Directorate General of Foreign Trade (DGFT) under Ministry of Commerce and Industry.

They represent the major portion of merchandise consignable by rail and river within India and are generally the important commodities of inland trade. In case of air, commodity-wise break ups are not shown separately as Airlines do not capture the same. The movement of goods by Rail has also been classified according to the 99 Chapters of International Trade Classification (Harmonized System) Revision 2021.

1.6 Importance of the publication:

Inter-state movement of goods provides information on entry of goods from one state to another state and thus indicates addition to the stock of the said goods of the state to which movement occurs as well as indicates decline in stock of that goods of the State from which movement occurs.

The entry of goods to a State commonly known as inward movement while exit of goods from a State is outward movements. The movements of goods within the boundaries of any State, is treated as internal movement within the states which give information on internal use of the goods in the state and this internal use do not come under the purview of inland trade.

Thus, Inter-State movement/flow of goods statistics shows the demand of goods produced in a State along with flow of it to other States.

1.7 Fact and Figures

The report on "Inter-state movements/flows of goods" includes Statistics on movement of goods between various States of India which is commonly known as Inland Trade. Inter-state movements/flows of goods by Railways in 2021-22

Chapter II

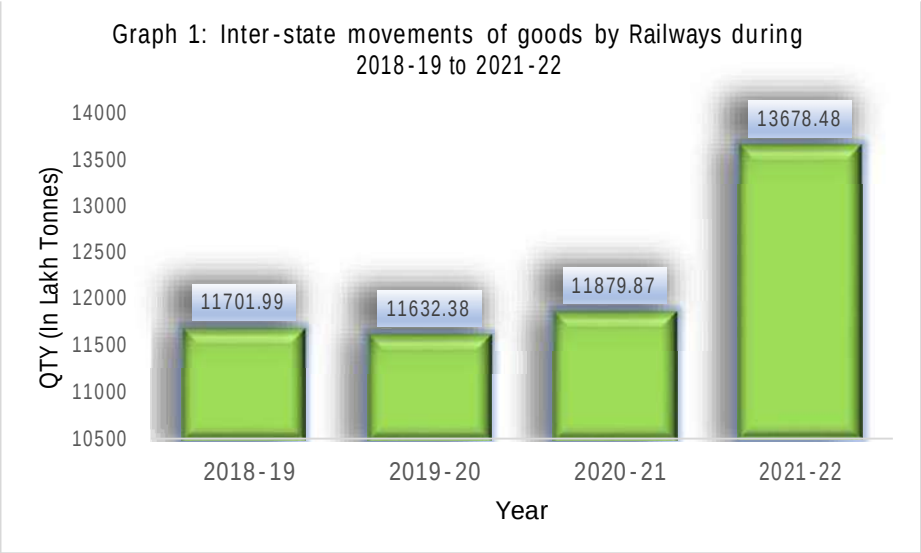
2.1 Inter-state movements/flows of goods by Railways

Rail is the one of the important modes of inter-state movement of goods in India. Indian Railways is transporting commodities to different parts of the country using freight trains.



During 2021-22, total 13678.48 lakh tonnes of goods were transported by rail within India, including internal movement, which shows a positive growth of 15.14 % over 11879.87 lakh tonnes in 2020-21. During 2021-22, total outward/inward movement of goods by rail was of 9120.9 lakh tonnes, a rise by 18.36% over 7706.2 lakh tonnes in 2020-21.

2.2 State wise movement by Rail

2.2.1 Outward Movement by Rail :

Share of top 10 states in total outward movement of goods by rail in 2021-22 is 83.13% which is a marginal decrease of 0.34% than 2020-21. However, in 2020-21 it witnessed decline by 1.92% over 2019-20. A decline in this share indicates a movement towards more diversification while an increase in it indicates more concentration.

As shown in table A1, Odisha is the most contributing state in total outward movement of goods in 2021-22, with share 17.71% followed by Jharkhand (15.74%) and Chhattisgarh (13.67%).

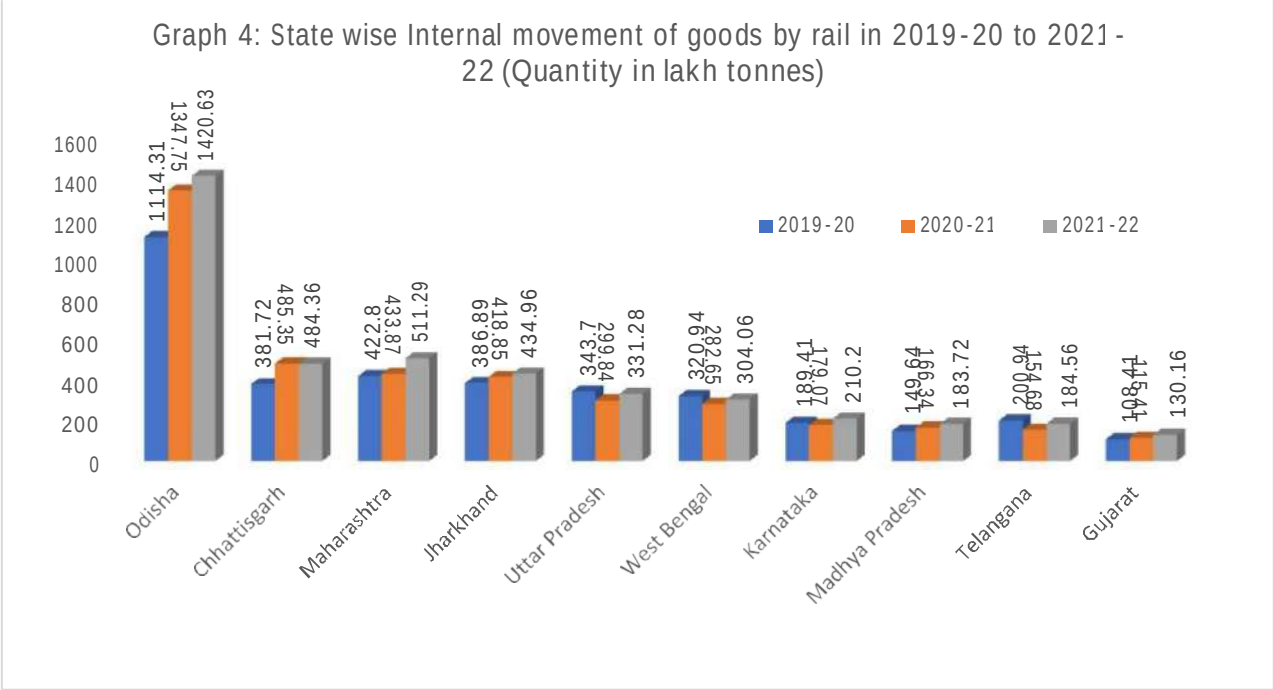
This is a decline by 1.01% over total internal movement of goods in 2020-21 implying that internal trade is no more limited to larger states in terms of share. The other smaller states also witnessing an increase in internal movement.

As shown in table A3, internal movement of goods occurred majorly in Odisha with share 31.17% of total internal movement of goods in India, followed by Maharashtra (11.22%), Chhattisgarh (10.63%).



From the chart A3, it is clear that internal movement of goods within Odisha far outweighs than that of any other States. Also, it has been increasing over the years.

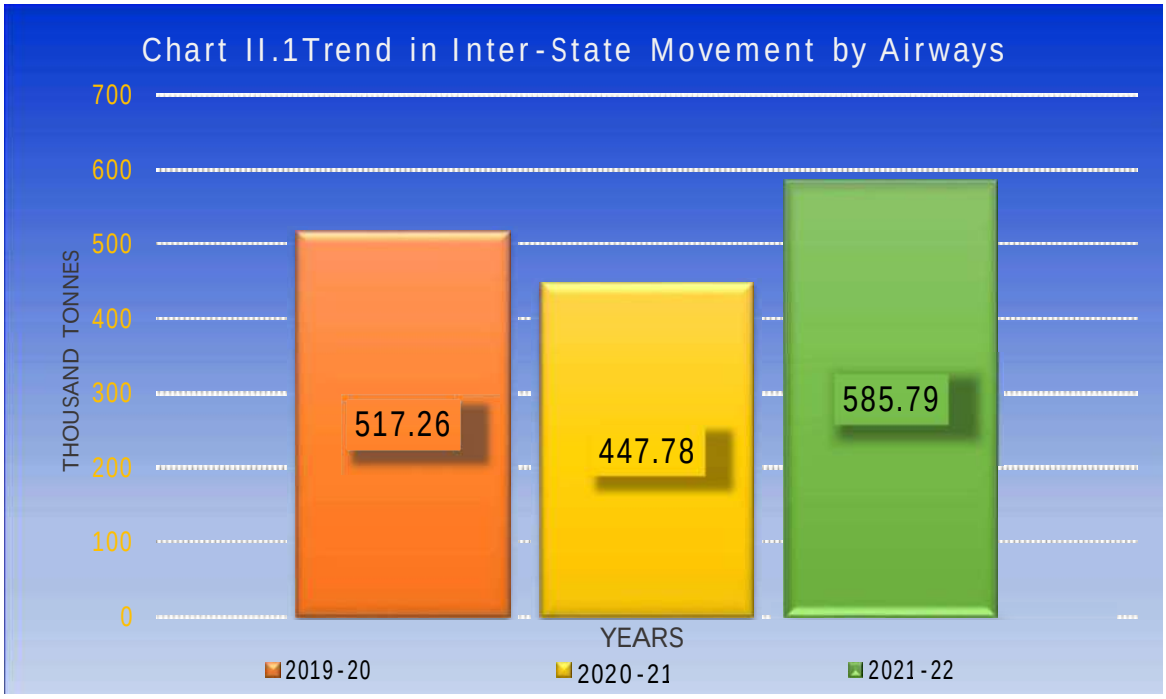
Chapter III

Inter-state movements/flows of goods by Airways in 2021-22

Chapter III

3.1 Inter-state movements/flows of goods by Airways:

Air transport is one of the several ways to move goods with speed. Air transportation provides convenient, reliable and fast services of transport. Importance of Air transportation increased in recent times with the advent of e-commerce and demand for rapid delivery. Moreover, changing business models such as just-in-time manufacturing, outsourcing of critical components and processes all contributed to it. Also, it is considered to be the only means of transport in those regions that are not readily accessible to other modes of transport. During 2021-22, 585.79 thousand tonnes of goods were transported by airways within India, an increase by 30.82% over 447.78 thousand tonnes of goods transported by airways in 2020-21.



During 2021-22, total outward/inward movement of goods by airways was of 577.51 thousand tonnes, an increase by 31.26% over 439.99 thousand tonnes of outward/inward movement of goods in 2020-21.
