PREFACE

The Directorate General of Commercial Intelligence & Statistics (DGCIS) is entrusted to compile various trade related statistical data of India. In the present publication, an attempt has been made to analyze the data related to internal trade by sea, which is known as “Coastal Trade”. The current publication entitled as “Statistics of the Inland Coasting Trade Consignments of India” contains data on internal trade by sea pertaining to the financial year 2023-24.

This publication contains information on value and quantity of all commodities moved by sea amongst different states/UTs and also within a state/UT through different tables and diagrams.

I am highly thankful to all the ports for providing data thereby making this report a reality. I also highly appreciate the efforts made by officers and officials of DGCI&S involved in the preparation of this report. I hope this report will be found useful by planners, policy makers, academicians and researchers etc.

Chapter One

Introduction

This chapter provides a brief background of the inland coasting trade consignments of India during the period April 2023 to March 2024

- 1.1 Coastal Trade Statistics are the data on Trade Consignments of commodities passing from one port to another by sea within India. It does not include external trade i.e. international trade done by India with other foreign countries. The statistics for which are available at the DGCI&S portal (www.dgciskol.nic.in).
- 1.2 The present publication is based on the Daily Trade Returns (DTRs) received from different ports and Custom Authorities on regular basis. Custom authorities capture the information from relevant entry of bills giving details of the inward consignments moving through different ports.
- 1.3 This time Lakshadweep has been covered in this publication however only inward movement has been reported while no outward & internal movements have occurred for this state in this financial period April 2023 to March 2024. All data have been given by the Assistant Commissioner of Customs, Cochin.
- 1.4 For the purpose of Coastal Trade Statistics, Sea ports of India have been grouped under 12 States/UTs viz. (1) Andaman and Nicobar Islands, (2) Andhra Pradesh, (3) Goa, (4) Gujarat, (5) Karnataka, (6) Kerala, (7) Lakshadweep, (8) Maharashtra, (9) Odisha, (10) Puducherry, (11) Tamil Nadu and (12) West Bengal. Information received from these ports along with custom authorities is compiled by Ancillary division of DGCI&S and a report titled "Statistics of the Inland Coasting Trade Consignments of India" is published and uploaded annually on the website of this office for the purposes of various users as well as subscribers.
- 1.5 It is worthwhile to mention that data (DTR) received from different ports are not very regular and this office cannot validate all the data received from the ports.

Chapter Two

Concepts and Definitions

This chapter discusses about various concepts and definitions regarding the collection of relevant data and their presentation in various forms of tables and charts for this publication

- 2.1 Business transactions between any two state/UTs or between a state and an UT are covered under inter-state consignments; while business transactions within a state/UT are covered under internal consignments.
- 2.2 Accordingly, data on shipments from one port to another within the same state are treated as internal trade of the concerned state and are taken into account separately in compilation of coastal trade statistics. On the other hand, the movement of consignments from one state to another is treated as inter-state trade. Further, the inter-state movements of goods have also been classified on the basis of their individual state of origin and state of destination.
- 2.3 Movement of goods classified on the basis of state of origin is shown as Outward movement of goods from the states and the movement of goods classified on the basis of their destinations is tagged in the tables as Inward movement of goods into those states. The commodities are presented as per the ITC (HS) 08-digit classification as adapted for foreign trade compilation.
- 2.4 From last two years a new initiative has been started. This office receives some data from the port offices which do not contain all the basic transaction data regarding the commodities traded. Values of goods of such transactions have been statistically estimated by DGCI&S office using rest of the data received from other sources rather than discarding such precious information. This helps in increasing the coverage of this publication significantly.
- 2.5 It is, however, admitted that in absence of data from all ports this report is not fully exhaustive.

Figure 3.1V: Pie chart showing state wise share of outward movement of inland coasting trade by percentage of all commodities

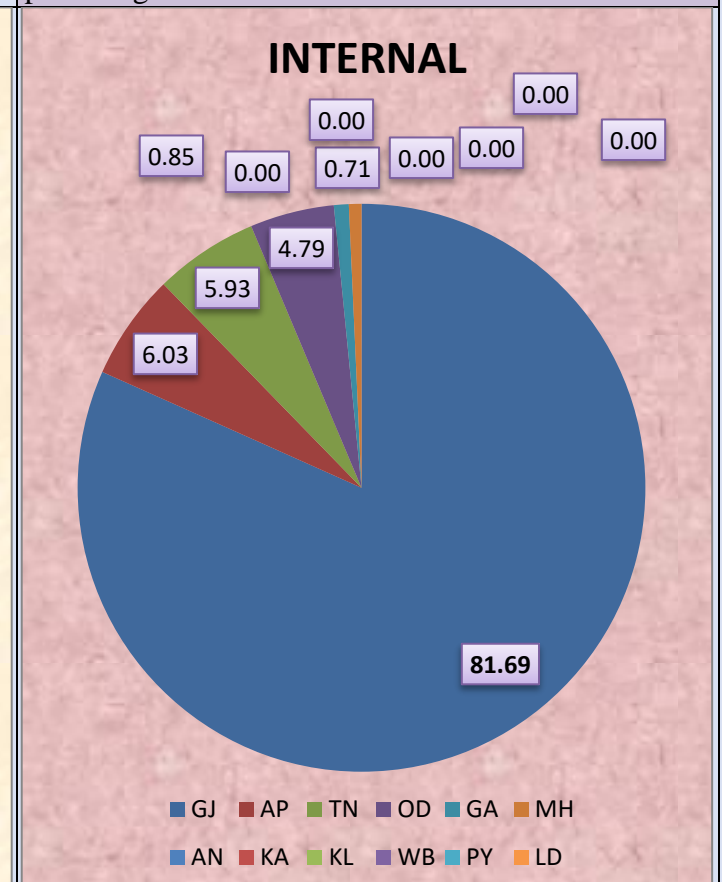

From the above statement 3.1V and figure 3.1V it is observed that during the period April 2023 to March 2024, GJ came out to be the maximum contributor having approximately 41.39% share, KL became the second maximum state having around 22.88% share and OD stood at third place with 21.72% share of total value of outward movement. Thus the above three states together held nearly 85.98% share of total outward movement considering all the reported commodities.

Figure 3.2V: Pie chart showing state wise share of inward movement of inland coasting trade by percentage of all commodities

From the above statement and figure 3.2V it is deduced that during the same period, MH came out to be the top consumer with 21.70% share, TN became the second highest intaker state bearing 20.07% share and WB went down to third place with 12.43% share of total value of inward movement. Thus the above three states together made for about 54.20% share of total value of inward movement considering all the reported commodities.

Figure 3.3V: Pie chart showing state wise share of internal movement of inland coasting trade by percentage of all commodities

Both the above statement and figure 3.3V depict that in the FY April 2023 to March 2024, GJ secured 1st place among all the states with 81.69% share, AP came right below GJ with 6.03% share and TN snatched third spot with share 5.93% of total value in the internal movement table. Therefore these top three states together accounted for 93.65% share of total value of internal movement covering all the reported commodities.
